1. A Soviet POL and ammunition depot is located about 600 m. northwest of the town of Petfurdó (4709 N 1807 E). It can be reached by a newly built first-class road that branches off the Varpalota-Peremarton state highway on the west side of Petfurdó. A spur line connects the depot with the main railroad line. The entire depot area is surrounded with barbed-wire about three meters high.
2. The area marked No. 1 on the enclosed sketch, is the fuel depot with six underground tanks, each with a capacity of 200 tons. These tanks are used for the storage of the gasoline produced by the Petfurdó chemical plants.
3. The area marked No. 2 is the artillery ammunition depot, made up of 12 storerooms in the shape of bunkers, each with an area of approximately 25 x 10 m. These storerooms are underground three fourths of the way. They hold approximately a total of 80 freight carloads of artillery ammunition and ammunition for tanks. The depot is guarded by about 45 Soviet soldiers wearing black shoulder boards.
4. The circles on the sketch denote watch towers that are manned on a 24-hour basis and are equipped with searchlights.

Annex: Sketch - map of Soviet POL and Ammunition Depot near Petfurdó (1 page).
